

John Soccio

North Caulfield

18 July 2019

We required a complex, architecturally designed extension and renovation to our home, one of a pair of 1930s houses, retaining the period features.

Fitzgerald Projects worked closely with us to provide alterations to save and contain costs prior to starting the job.

By providing alternative solutions for construction, foundations and steel works, we were able to make substantial savings.

The team at Fitzgerald Projects provided a premium product with quality and patience. Throughout the project, they kept offering key pieces of advice which resulted in a quality product for a reasonable price.

They were easy to work with and dealt with the neighbours and ourselves at all times in a professional and respectful manner.

I would be delighted to recommend them for any future building works of this nature.

I am happy to talk about this project further if required.

Please contact Fitzgerald Projects for my phone number.
