

Customer: Citywide

Description of work:

Revamping old warehouse for new, northern suburbs' depot.

Incorporating renovated office facilities, staff changerooms and ablution areas.

In early 2020, we provided some basic mud-maps for the above facilities, working closely with the manager.

It also included some negotiations with the landlord to protect the interests of our clients.

From this initial design brief, we achieved a more than satisfactory result.

The final renovation was able to be completed using the best cost effective and efficient methods.
